

2.a)

```
SELECT COUNT(OrderID)
FROM [Orders]
WHERE SHIPPERID = 1
```

In total, Speedy Express shipped a total of 54 orders.

2.b)

```
SELECT LastName
FROM Employees
WHERE Employees.EmployeeID =
(SELECT EmployeeID
FROM Orders
GROUP BY EmployeeID
ORDER BY COUNT(*) DESC
LIMIT 1)
```

The last name of the employee with the most orders is Peacock.

2.c)

```
SELECT ProductName, SUM(Quantity)
FROM [Customers]
INNER JOIN Orders ON Customers.CustomerID = Orders.CustomerID
AND Customers.Country = 'Germany'
INNER JOIN OrderDetails ON Orders.OrderID = OrderDetails.OrderID
INNER JOIN Products ON OrderDetails.ProductID = Products.ProductID
GROUP BY OrderDetails.ProductID
ORDER BY SUM(Quantity) DESC
LIMIT 1;
```

The most ordered product by customers in Germany is Boston Crab Meat, with 160 orders.
